LET'S FACE IT — AFTER GOING UNDER THE KNIFE, THESE CELEBS WENT FROM STUNNING TO SHOCKING!

TROPHIES!

Barry Manilow, 75

He can't smile without you... that is if he can smile at all these days. "The visible folds in his neck are from an unsuccessful face-lift and need to be corrected," explains Natural Look Institute founder Dr. Yoel Shahar, adding that Barry likely had a nose job too.

"He also needs to fix the overdone fillers in his cheeks since it gives him a feminine look."

Lara Flynn Boyle, 48

While her puffy face and squinty eyes are the result of a slow downward spiral over the past decade, Lara also started on the slippery slope of plastic surgery. "She got more insecure about her looks and had a number of procedures," blabs a pal. "Unfortunately, they only made her look more bizarre."

Meg Ryan, 56

When Harry met Sally back in 1989, America's Sweetheart didn't look so sleepless in Seattle! Over the years, Meg likely had fillers, according to NYC's Dr. David Shafer. "Filler helps lift the face, but it may also make the face appear too full," he says, suggesting Meg lay off the puffers and instead focus on fixing her crow's-feet: "Botox would smooth the skin around her eyes," he explains. "And a lower eyelid job would also help tighten the skin there. She doesn't need more filler."

Plastic Surgery CATAS

**STAR
NOSE
THE
TRUTH!**

Kim Kardashian, 37

Obsessed with surgery, the reality star is now nearly unrecognizable. Dr. Douglas Senderoff of Park Avenue Aesthetic Surgery in NYC suspects that thousands of dollars' worth of fillers are at fault for Kim's stiff face: "Her nasal labial folds — the grooves around her mouth — look deeper than before, which could be a result of excess filler in the cheek area, creating a heavy look."

Lil' Kim, 43

Between her bleached skin and shrinking schnoz, the queen of rap looks more like the king of pop! "Her nose seems pinched, which means that too much cartilage was taken out during a rhinoplasty," explains NYC-based plastic surgeon Dr. Norman Rowe. "Kim's cheeks are also overfilled and not in proportion with the rest of her features." Seems like more than a just a lil' problem, Kim!

Mickey Rourke, 65

Once a Hollywood heartthrob, Mickey is no longer turning heads... he's just messing up his own! Drugs and booze could be to blame, but shoddy surgery seems to have made things worse. "He has possibly had a face-lift, an upper and lower eye-lift and fillers to his cheeks," speculates Dr. Rowe.
